PAULO HENRIQUE MARTINS

SENIOR FULL-STACK ENGINEER

São Paulo, Brazil | Phone: +55 11 945512529 | Dual Citizenship: Brazilian / Portuguese
Email: paulohenrique@paulovelho.com | Portfolio & CV: platypusweb.com.br/cv/paulo/

PROFESSIONAL SUMMARY

Versatile Senior Full-Stack Engineer with nearly 20 years of professional experience designing, building, and maintaining modern software systems. Proven capability leading technical projects, scaling products from inception, and adapting rapidly to evolving technology frameworks. Deep specialization in JavaScript/TypeScript web architectures paired with comprehensive cross-layer development skills spanning mobile applications, robust backend APIs, and database engines. Globally mobile with comprehensive distributed team experience across Europe and Latin America.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, PHP, Java, Dart (Flutter), Ruby, C# (.NET), SQL
Front-End:	Angular (AngularJS 1.2 to modern implementations), React, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, jQuery, Flex
Back-End & APIs:	Node.js, RESTful APIs, Microservices, Ruby on Rails, PHP MVC frameworks, Swagger
Mobile Layers:	Ionic, Flutter, PhoneGap, Cordova, Mobile Broadcasters (VLCLib), Native SDKs (Objective-C, MonoTouch)
Databases & Infra:	MySQL, MSSQL, Oracle, Couchbase, ElasticSearch, Docker, Apache, Git, CI/CD integrations

LANGUAGES

English: Fluent | **Portuguese:** Native | **Spanish:** Fluent | **German:** Intermediate | **Italian** / **French:** Beginner

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer & Founder — Platypus (Software Consultancy)

São Paulo, Brazil | Mar 2013 – Present

Architect and deliver custom, end-to-end web and mobile applications for a global freelance clientele.

- Design and engineer comprehensive front-end solutions utilizing Angular, TypeScript, and modern responsive design utilities.
- Deploy secure back-end infrastructures and business APIs using PHP, Node.js, and containerized Docker layers.
- Develop cross-platform, natively compiled mobile applications using Flutter, Ionic, and Cordova deployment frameworks.
- Partnered within enterprise engineering groups to construct high-volume transactional e-commerce sub-systems for major media networks (Editora Globo).

Co-Founder & Technical Lead — Botecaria

São Paulo, Brazil | Jan 2013 – Jan 2025

Co-founded and scaled a regional distribution and logistics startup from inception.

- Designed and managed all physical and technical infrastructure dependencies, logistics tooling, and local server configurations.
- Gained direct operational business acumen spanning local tax structures, team hiring, financial allocations, and corporate scalability.

Full-Stack Developer — BairesDev

Fully Remote | Sep 2020 – Apr 2023

Integrated into distributed agile scrum groups to build, test, and ship long-term software features for corporate enterprise clients.

- Extended and optimized technical modules inside massive front-end single-page applications built on Angular platforms.
- Created structured, reliable microservice REST endpoints utilizing Node.js and PHP, managing architecture specifications via Swagger.

Full-Stack Developer — Alpar Service

São Paulo, Brazil | Nov 2018 – Aug 2020

Delivered digital transformation systems and high-availability modules for prominent digital consulting client accounts.

- Served as core full-stack software engineer for Smiles S.A., maintaining and pushing features to a high-traffic frequent-flyer application ecosystem.
- Spearheaded two separate hybrid mobile initiatives using Ionic, managing full cycles from system architecture through production store deployments.

Frontend / Full-Stack Developer — Savedo (Finleap / Hitfox Group) *Berlin, Germany | Aug 2015 – Jan 2018*

Engineered high-security financial tracking portals for a leading European fintech group during its rapid marketplace expansion phase.

- Architected core single-page application front-ends with Angular, TypeScript, and Ionic to pipeline financial assets to backend APIs safely.
- Constructed modular web components and customer-facing interfaces leveraging Ruby on Rails backend integrations.

Software Developer — Element Wave *Galway, Ireland | Jan 2015 – Aug 2015*

Contributed to an early-stage SaaS startup focused on push-telemetry analytics software development and native mobile framework tracking.

- Built high-velocity event tracking backends utilizing Node.js and delivered responsive client-facing data dashboards with AngularJS.
- Modeled and scaled non-relational database layers utilizing Couchbase distributed data stores and ElasticSearch indices.

Technical Consultant / Developer — Aprimo (Teradata) *London, United Kingdom | Nov 2011 – Sep 2012*

- Engineered custom system integrations and database queries using .NET C# and enterprise MSSQL database configurations.
- Maintained developer customer-facing consulting channels, custom-fitting the marketing management platform via proprietary APIs.

Developer & Technical Consultant — Easypay *Lisbon, Portugal | Mar 2011 – Sep 2011*

- Provided architecture consulting to engineering teams and merchants deploying electronic payment gateway REST APIs.
- Programmed transactional Full-Stack components and data integrations using PHP and MySQL.

Developer & Project Manager — LabOne Systems S/A *São Paulo, Brazil | Oct 2008 – Jan 2011*

- Coordinated agile sprint delivery lines and acted as core engineer for Sonora, then Latin America's largest music distribution network.
- Modeled object-oriented data systems combining C#, .NET, Java, jQuery frameworks, and the Google Maps API.
- Developed native mobile application interfaces utilizing Apple SDK, Objective-C, and early-stage MonoTouch environments.

Software Developer — EWTI - Engenharia de Web *São Paulo, Brazil | Apr 2006 – Sep 2008*

- Designed and maintained data-intensive web properties for enterprise clients leveraging PHP, ASP, .NET, and Java technologies.
- Conducted indexing optimization and database architecture designs spanning MSSQL, Oracle, and MySQL engines.

PERSONAL PROJECTS

MagratheaPHP | PHP Framework *platypusweb.com.br/magratheaphp2/website/*

Engineered a lightweight, high-performance PHP framework optimized for rapid web application development and API creation.

- Implemented a planetary-scale Object-Relational Mapping (ORM) engine, standard .ini environment configurations, and an automated SMTP email queue manager.
- Built a visual, responsive Admin console offering point-and-click database table-to-model code generation, interactive SQL terminal execution, and hot environment reloading.
- Architected a smart routing engine achieving 1,382+ req/sec throughput at sub-millisecond CPU latency (0.72ms) and minimal memory footprints (0.3MB).

guia.lol | Digital Business Card & Event Aggregator for Artists *guia.lol*

Designed and built a unified web platform providing digital business cards, link sharing, and show schedule management tailored for artists and creators.

- Integrated OAuth Google Authentication for frictionless, passwordless onboarding and artist dashboard administration.
- Implemented automated web scraping/import integrations with ticket platforms (Sympla and Eventim) to auto-populate event metadata, locations, dates, and media.
- Created customizable, SEO-optimized vanity URLs (guia.lol/name) with visual show agendas and direct ticket acquisition funnels.

ACADEMIC BACKGROUND

Bachelor of Computer Science — Mackenzie University, São Paulo, Brazil *(Graduated: December 2007)*
